

# MAX-IN™ Boron

By WINFIELD  
UNITED

## Foliar Micronutrient with MAX-IN™ Technology

MAX-IN Boron is an effective foliar-applied source of boron that contains MAX-IN technology to greatly increase the movement of micronutrients through the leaf cuticle and into internal structures.

### FEATURES AND BENEFITS

- Contains MAX-IN technology, designed to increase humectancy to make more of the applied nutrient available for plants.
- Helps plants absorb boron to better optimize crop production, as boron influences cell development, metabolism and reproduction.

### Compatibility

MAX-IN Boron mixes easily with other crop nutrients and most crop protection products, including glyphosate based herbicides. When MAX-In Boron is tank mixed with glyphosate, an ammonium sulfate source such as Crimson® adjuvant should always be used.

### Feed the Hidden Hunger

Tissue sampling and analysis at key growth stages can help pinpoint nutrient deficiencies before yield potential is reduced, so you can apply exactly what your crop needs, when it needs it.

### WinField® United Plant Nutrition

WinField United plant nutrition provides high-quality plant nutrients for healthy plants and optimal yields. These proven, versatile performers are specially formulated to meet the nutritional needs of crops across a broad range of soil conditions, fertility programs and tillage practices.

	<b>REGION</b> All
	<b>USE RATE†</b> Most crops: 0.35-0.71 L/ac
	<b>APPLICATION GUIDE†</b> Foliar. Corn: V3 to V9 Canola: 5 leaf to 30% bloom Cereals: GS 21 to GS 33 Soybeans: V3 to R1
	<b>ACTIVE INGREDIENTS†</b> 8.0%: Boron
	<b>PACKAGING</b> 2 x 10 L 450 L tote
