

MAX-IN™ Ultra ZMB®

By WINFIELD UNITED

Foliar Micronutrient with MAX-IN™ Technology

MAX-IN™ Ultra ZMB combines zinc, manganese and boron into one convenient and effective foliar micronutrient product. MAX-IN products contain MAX-IN technology to greatly increase the movement of micronutrients through the leaf cuticle and into internal structures.

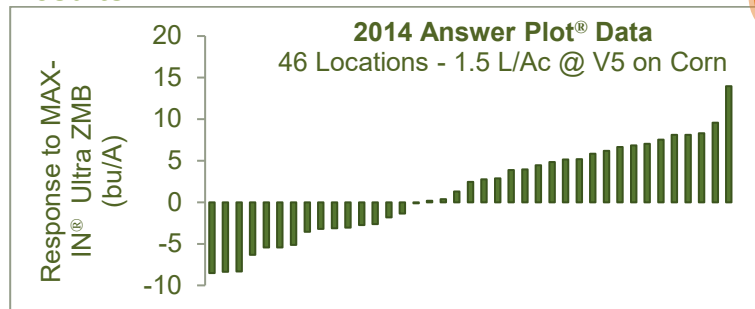

FEATURES AND BENEFITS

- Contains MAX-IN technology, designed to increase humectancy and uptake.
- Zinc is part of auxin, a well-known plant growth hormone, and aids in leaf growth.
- Manganese is essential for photosynthesis in all plants, and plays a key role in resistance of plant diseases.
- Boron influences cell development and is essential during reproductive stages.

Compatibility

MAX-IN Ultra ZMB micronutrient mixes easily with other plant nutrients and most crop protection products, including glyphosate-based herbicides. When MAX-IN Ultra ZMB micronutrient is tank-mixed with glyphosate, an ammonium sulfate source such as Crimson® adjuvant should always be used.

Feed the Hidden Hunger

Tissue sampling and analysis at key growth stages can help pinpoint nutrient deficiencies before yield potential is reduced, so you can apply exactly what your crop needs, when it needs it.

WinField® United Plant Nutrition

WinField United plant nutrition provides high-quality plant nutrients for healthy plants and optimal yields. These proven, versatile performers are specially formulated to meet the nutritional needs of crops across a broad range of soil conditions, fertility programs and tillage practices.

REGION
All

USE RATE†
Most crops: 1.0-2.0 L/ac

APPLICATION GUIDE†
Corn: V3-V8
Canola: 5 leaf to 30% bloom
Cereals: Tillering to early jointing
Soybeans: V3 to R1

ACTIVE INGREDIENTS†
4.0%: Zinc
3.0%: Manganese
0.12%: Boron

PACKAGING
2 x 10 L
450 L tote
