

HiActivate®

Non-ionic surfactant

HiActivate adjuvant is a water-soluble, high-quality surfactant for use with post-emergent crop protection products. This non-ionic spreader/activator is low foaming for easy mixing.

FEATURES AND BENEFITS

HiActivate adjuvant improves the properties of spray droplets, optimizing your crop protection product investment.

- Improved adhesion of spray droplets to the target plant's leaf surfaces.
- Reduced surface tension, which allows droplets to spread out over a larger area of the leaf surface.
- Improved wetting, spreading and dispersing of spray solution.
- Increased pesticide absorption and efficacy.
- Low-foaming formulation.

REGION
All

USE RATE
0.1% - 0.25% v/v

APPLICATION GUIDE †
Use a higher end of rate range in difficult wetting situations such as hard water or mature waxy foliage.

PACKAGING
2 x 10 L

ACTIVE INGREDIENTS
90%: Glycerol, sodium xylene sulfonate
10%: Other Constituents
