## Methylated Seed Oil for Improved Herbicide Performance

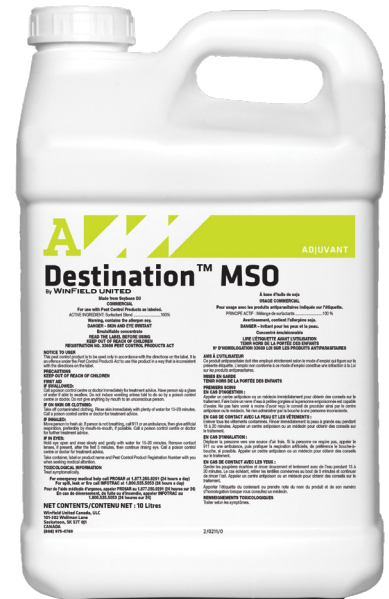

Destination MSO contains methylated seed oil and emulsifiers for increased pesticide uptake and effectiveness. Destination MSO is used to help breakdown waxy leaf surfaces to allow greater pesticide uptake.

### FEATURES AND BENEFITS

- Destination MSO is used to help breakdown waxy leaf surfaces to allow greater pesticide uptake.
- Destination MSO improves adhesion and adsorption of pesticides onto and into plant tissue.
- Use Destination MSO where oil adjuvants are required.
- PMRA approved activator adjuvant.
