

# Antler® 360 Unpacked

CROP PROTECTION

## \*Adjuvant Sold Separately

Antler 360 Unpacked provides the high-performance grass control you expect from a clethodim formulation, but with 50% more active ingredient per liter.

## FEATURES AND BENEFITS

- The most unique clethodim formulation on the market! This new formulation offers less storage and handling through the year while maintaining the same great grassy weed control. One case treats **320 acres**.
- **Antler 360 Unpacked requires an adjuvant for maximum effectiveness.** ALWAYS tank mix with an approved oil based adjuvant such as Journey™ HSOC at 0.5% v/v for suitable performance.
- Fast control of a broad spectrum of emerged annual and perennial grass weeds including wild oat, volunteer corn and volunteer cereals.

## For use on most broadleaf crops including:

Canola | Pulse Crops | Soybeans | And More

## Application Timing:

Most crops are tolerant at a wide range of stages, so target applications at the optimum weed stage. See label for more information.

## Application Rates

For best results use Antler 360 Unpacked at 50 mL/acre  
**1 jug treats 80 acres | 1 case treats 320 acres | add Journey HSOC at 0.5% v/v**

## Adjuvant Rates

- Journey HSOC at 0.5% v/v
- InterLock® at 100 acres/jug

## Top Tank Mixes

- On glufosinate tolerant canola tankmix Antler 360 Unpacked with Justice™ glufosinate
- Mixing order: Antler 360 Unpacked, Justice glufosinate, Journey HSOC, InterLock

## Minimum Water Volume

- Ground application 6 US gal/acre minimum
- Aerial application 3 US gal/acre minimum

## Rainfast

- 1 hour, rainfast is typically limited by tank mix partners

## REGION

All

## COMMON USE RATE

80 acres/jug  
320 acres/case

## RECOMMENDED ADJUVANT

Journey HSOC - 0.5% v/v

## PACKAGING

4 x 4L jugs/case

## ACTIVE INGREDIENT

Clethodim 360 g/L

## HERBICIDE GROUP

Group 1

## Did You Know?

Clethodim can be antagonized by hard water. Test your water and add Crimson® NG water conditioner for optimum performance.

Always read and follow label directions.

**Weeds Controlled:**

Key Weeds	Leaf Stage	Rate	Comments
Wild oats, volunteer cereals (wheat, barley, oats), green and yellow foxtail	2-4 leaf	33 mL/ac (120 acres/jug)	Use only in absence of stress do not tank-mix with other pesticides
Volunteer corn, barnyard grass, fall panicum, witchgrass, proso millet, volunteer canary grass	2-6 leaf	+ adjuvant	
Wild oats, volunteer cereals (wheat, barley, oats), green and yellow foxtail, volunteer corn, barnyard grass, fall panicum, witchgrass, proso millet, volunteer canary grass, Persian darnel, crabgrass (smooth and large) Quackgrass (suppression only)	2-6 leaf	50mL/ac (80 acres/jug) + adjuvant	Registered for tank-mix applications with glufosinate 150 at 1.35L/ac and 1.62L/ac
Quackgrass	2-6 leaf	100mL/ac (40 acres/jug) + adjuvant	Rate not registered in chickpeas or common beans

**How does the Antler 360 Unpacked application rate compare to other clethodim based products?**

Clethodim herbicides are available in different formulations and amount of active ingredient per liter. Antler 360 Unpacked has 360 grams of clethodim per liter. Antler 240 Co-pack and most other clethodim products contain 240 grams of clethodim per liter.

Antler 360 Unpacked		Antler 240 Co-pack		Select®
<b>mL per acre*</b>				
33	=	50	=	50
50	=	75	=	75
100	=	150	=	150

\* Use rates are generally rounded. Always read and follow label directions.

The table below displays the application rate in acres per smallest saleable unit that would apply the equivalent amount of clethodim active ingredient per acre. Note that Antler 240 Co-pack is sold by the case. Antler 360 Unpacked is sold by the jug, with adjuvant sold separately.

Antler 360 Unpacked		Antler 240 Co-pack		Select
<b>acres per jug      acres per case      acres per case</b>				
120	=	60	=	60
80	=	40	=	40
40	=	20	=	20

\* Use rates are generally rounded. Always read and follow label directions.
