

# ProTank® Cleaner

By WINFIELD  
UNITED

Looking for the easy button? This non-ammonia based Commercial Spray Tank Cleaner helps remove pesticide and fertilizer residues as part of a sprayer cleaning protocol. Choose ProTank® Cleaner for effective tank cleanout.

## FEATURES & BENEFITS

- ProTank Cleaner is a pre-dissolved, non-ammonia based, sprayer tank cleaner that neutralizes acidic-type chemicals.
- Contains a proprietary blend of salts, sequestering agents, surfactants and solvents and should be used as part of a triple-rinse spray clean out protocol.
- Helps remove pesticide and fertilizers residues while cleaning pumps, valves, strainers, tanks, nozzles, hoses. ProTank Cleaner also helps reduce metal corrosion and the deterioration of rubber seals diaphragms and hoses, helping to prolong the life of equipment.
- Always read and follow label directions for appropriate tank cleanout procedures. Products with a high risk of crop damage as a result of very low-level contamination of the spray solution, will have specific tank cleanout measures indicated.

### General Recommendations\*

- |  |   |
|--|---|
| <ul style="list-style-type: none"> <li>• Drain tank</li> <li>• Rinse inside and out of tank</li> <li>• Fill tank half full of clean water; add ProTank Cleaner</li> <li>• Agitate 15-20 minutes</li> <li>• Let stand for time recommended on label</li> <li>• Run the solution through nozzles for at least 5 minutes</li> </ul> | <ul style="list-style-type: none"> <li>• Triple rinse with clean water</li> <li>• Spray rinsate through booms</li> <li>• Clean screens, nozzles and inductor cones</li> <li>• Don't let product sit in the boom</li> <li>• Look in the tank when you are done to make sure nothing is stuck to the sides</li> </ul> |
|--|---|

\*Recommendations may vary depending on the specific products. Some labels indicate tank cleaner or ammonia.

Recent research shows that 2-3 smaller rinses are more effective than one large volume rinse. Think 3 x 400 gallon rinses vs 1 x 1,200 gal rinse!
